

# OUTDOOR LEARNING

## at Eastbury!

This is our second outdoor learning newsletter of 2022. As the weather improves we plan on making even more use of our wonderful outdoor spaces to enrich the children's learning. Have a look at the high-quality learning taking place outside the classroom this term. 'We are not saying 'good bye' to our classrooms; we are opening them up!'

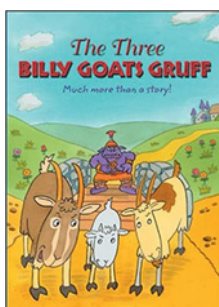

### Nursery

This term the children have been planting outdoors and observing their plant grow each day. They have learnt about a life cycle of a bean and what plants need to grow and survive. They have also enjoyed playing in the construction area becoming builders, building train tracks, developing their balancing skills, and making music.

### Reception

Reception have been reading the story 'The Three Billy Goats Gruff'. The children built a strong bridge for them to cross over the other side to enjoy the sweet, green grass! Have a look at their architectural masterpiece on the right!

## Year 1

Year 1 have enjoyed their hands-on maths activities! They have been exploring length by measuring items in their outdoor areas. See below.

Story time with Ms Hodges on the story telling chair! Year 1 enjoyed gathering together and listening to an exciting story read by our reading guru!

## Year 2

In Science we walked around the school to identify what different objects were made from. We used our senses 'touch' to discuss the properties of the objects to then identify what materials they were made from. The children really enjoyed this lesson!

## Year 3

Year 3 have been learning sign language related to Easter. Instead of having an Easter Egg Hunt, they had a Sign Hunt. Children enjoyed hunting around the Garden Centre finding cards to sign to their partner.

Happy Easter!

## Year 4

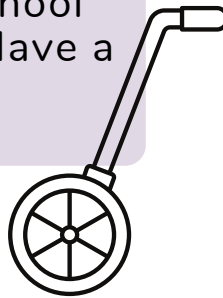

Year 4 pupils have been learning all about sound, how it travels over distance and what objects can either magnify or reduce sound.

Did you know sound travels slower through air than by water?

## Year 5

Year 5 have been learning all about measurement! They measured the length of several areas of the school using a trundle wheel! Have a look!

## Year 6

Year 6 have been learning about computer networks. The children have developed their understanding of networks and explored how data packets travel on the Internet.

Well done - network technicians!
