

We have a Scientist of The Month to celebrate *WOW* moments!

We are introduced to a wide range of scientific vocabulary which can be seen in our classroom displays.

We often make links to other subjects such as Geography, Religious Education, History, and Maths.

The Science council work hard to represent and improve the teaching and learning of Science, representing pupil voice for all children!

We love to ask questions and dive deep into each lesson as we always learn something new and exciting!

We make the most of our outdoor areas within the school and local community.

We work on fun and challenging family homework projects during the school holidays.

## Our Vision and Principles for Good Science at Eastbury Primary School

'Hands on' science learning is carefully planned for - and maximised to allow - children to explore and connect their learning to the world around them.

Age-appropriate scientific vocabulary is confidently used and modelled by staff.

Offer a broad and balanced curriculum

Promote questioning through discussion and deeper thinking by the use of initiative 'Bright Ideas' – Primary Science Teaching Trust

Encourage children to think scientifically in all areas, inspiring children to investigate and research independently.

**'The future belongs to the curious. The ones who are not afraid to try it, explore it, poke at it, question it and turn it inside out'.**

***The Vision for Science***

We encourage every child to show their curiosity, enthusiasm and enjoyment for Science through a range of engaging and hands on activities, which are explored in a stimulating and safe environment. Their knowledge and understanding of important scientific ideas are shaped through a variety of enquiry approaches.
